FavCircles

FOR STORE OWNERS

Turn your regulars into your best marketing.

FavCircles is where people save and share the places they love — so a recommendation for your store comes from a friend, not an ad. Claim your store and get loyalty rewards, local promotion, and order ahead in one app you run entirely from your phone.

First 3 months free · then $49.99 / month

WHAT'S IN IT FOR YOU

Word of mouth you can see

When a customer saves your store, their friends see it. Your dashboard shows who follows and saves you, scans and rewards used, and how each month compares to the last.

Loyalty with zero hardware

Your codes replace punch cards and pricey platforms. No POS integration, nothing to install. You set the points and the rewards — and change them anytime.

New faces find you — free

Your offers, announcements, and events show in the app's **Locals** tab to people right around your neighborhood. Post happy hour, live music, a tasting night — no ad spend, no algorithm to fight.

AT THE COUNTER, IT'S THIS SIMPLE

1 They scan your window sticker

It opens right on their phone, no download needed. They join and save your store, and earn the **welcome points you choose**.

2 They scan your register card

Every purchase earns points on their own phone — **you choose how many**.

3 They redeem, you honor it

A reward ticket appears on their screen for 15 minutes. Your staff tap **Given** — nothing to install, nothing to reconcile.

If a ticket expires before it's used, the points go back to the customer automatically.

KEEP THEM COMING BACK
